Contents Volume 202 (1998)

Water and solute fluxes in dry coastal dune grasslands: the effects of grazing and increased nitrogen deposition
M.J. ten Harkel, J.H. van Boxel and J.M. Verstraten **1–13**

Denitrification and N_2O emissions from a UK pasture soil following the early spring application of cattle slurry and mineral fertiliser
S. Ellis, S. Yamulki, E. Dixon, R. Harrison and S.C. Jarvis **15–25**

Methane emission from a wetland plant: the role of CH_4 oxidation in *Eriophorum*
P. Frenzel and J. Rudolph **27–32**

Effect of iron plaque outside roots on nutrient uptake by rice (*Oryza sativa* L.). Zinc uptake by Fe-deficient rice
X. Zhang, F. Zhang and D. Mao **33–39**

Effect of N source during soybean pod filling on nitrogen and sulfur assimilation and remobilization
J. Imsande and J.M. Schmidt **41–47**

Biological properties of some nitrogen-fixing associative enterobacteria
V.N. Pishchik, I.V. Mokrousov, A.M. Lazarev, N.I. Vorobyev, O.V. Narvskaya, I.I. Chernyaeva, A.P. Kozhemyakov and G.N. Koval **49–59**

Effects of a localized supply of nitrate on NO_3^- uptake rate and growth of roots in *Lolium multiflorum* Lam.
P. Lainé, A. Ourry, J. Boucaud and J. Salette **61–67**

Relationship between soil chemical factors and grassland diversity
F. Janssens, A. Peeters, J.R.B. Tallowin, J.P. Bakker, R.M. Bekker, F. Fillat and M.J.M. Oomes **69–78**

Bacterial associations with the mycorrhizosphere and hyphosphere of the arbuscular mycorrhizal fungus *Glomus mosseae*
G. Andrade, R.G. Linderman and G.J. Bethlenfalvay **79–87**

Soil aggregation status and rhizobacteria in the mycorrhizosphere
G. Andrade, K.L. Mihara, R.G. Linderman and G.J. Bethlenfalvay **89–96**

Soil microbiological parameters as indicators of soil quality under improved fallow management systems in south-western Nigeria
B. Wick, R.F. Kühne and P.L.G. Vlek **97–107**

Biocontrol activity of *Burkholderia cepacia* against *Rhizoctonia solani* in herbicide-treated soils
A. Heydari and I.J. Misaghi **109–116**

Effect of defoliation on the arbuscular mycorrhizas of three perennial pasture and rangeland grasses
N. Allsopp **117–124**

Soil nitrogen dynamics in northeastern Patagonia steppe under different precipitation regimes
M.J. Mazzarino, M.B. Bertiller, C. Sain, P. Satti and F. Coronato **125–131**

Leaf area expansion and assimilate production in sunflower (*Helianthus annuus* L.) growing under low phosphorus conditions
D. Rodríguez, M.M. Zubillaga, E.L. Ploschuk, W.G. Keltjens, J. Goudriaan and R.S. Lavado **133–147**

Leaf primordia initiation, leaf emergence and tillering in wheat (*Triticum aestivum* L.) grown under low-phosphorus conditions
D. Rodríguez, M.C. Pomar and J. Goudriaan **149–157**

Soybean cultivar variability for nodule formation and growth under drought
R. Serraj and T.R. Sinclair **159–166**

Elevated CO_2, rhizosphere processes, and soil organic matter decomposition
W. Cheng and D.W. Johnson **167–174**

Experimental determination and modelling of the soil water extraction capacities of crops of maize, sunflower, soya bean, sorghum and wheat
M. Cabelguenne and P. Debaeke **175–192**

Effect of water stress on the boron response of wheat genotypes under low boron field conditions
J. Pant, B. Rerkasem and R. Noppakoonwong **193–200**

Can plants track changes in nutrient availability via changes in biomass partitioning?
K.D.M. McConnaughay and J.S. Coleman **201–209**

Effects of sulfate on cadmium uptake by Swiss chard: I. Effects of complexation and calcium competition in nutrient solutions
M.J. McLaughlin, S.J. Andrew, M.K. Smart and E. Smolders **211–216**

Effects of sulfate on cadmium uptake by Swiss chard: II. Effects due to sulfate addition to soil
M.J. McLaughlin, R.M. Lambrechts, E. Smolders and M.K. Smart **217–222**

Cultivar variation in methane efflux from tropical rice
S.N. Satpathy, S. Mishra, T.K. Adhya, B. Ramakrishnan, V.R. Rao and N. Sethunathan **223–229**

Microbial ethylene consumption in peat-soil during ethylene exposure of *Begonia elatior*
L. Elsgaard and L. Andersen **231–239**

Decomposition of seawater-irrigated halophytes: implications for potential carbon storage
W.L. Goodfriend, M.W. Olsen and R.J. Frye **241–250**

The response of soil microorganisms and roots to elevated CO_2 and temperature in a terrestrial model ecosystem
E. Kandeler, D. Tscherko, R.D. Bardgett, P.J. Hobbs, C. Kampichler and T.H. Jones **251–262**

Effects of the chemical form of inorganic nitrogen fertilizers on the dynamics of the soil solution composition and on nutrient uptake by wheat
J. Yanai, D. Robinson, I.M. Young, K. Kyuma and T. Kosaki **263–270**

The response of lucerne (*Medicago sativa* L.) to sodium sulphate and chloride salinity
M.E. Rogers, C.M. Grieve and M.C. Shannon **271–280**

Transient three-dimensional modeling of soil water and solute transport with simultaneous root growth, root water and nutrient uptake
F. Somma, J.W. Hopmans and V. Clausnitzer **281–293**

Implications of pre- and post-fertilizing changes in growth and nitrogen pools following multiple applications of nitrogen fertilizer to a *Pinus radiata* stand over 12 years
W.A. Neilsen and T. Lynch **295–307**

Light-mediated release of phytosiderophores in wheat and barley under iron or zinc deficiency
I. Cakmak, B. Erenoglu, K.Y. Gülüt, R. Derici and V. Römheld **309–315**

End-of-season soil water depletion in relation to growth of herbaceous vegetation in a sub-humid Mediterranean dwarf-shrub community on two contrasting soils
Z. Henkin, N.G. Seligman, U. Kafkafi and D. Prinz **317–326**

Volume Contents **327–329**

Author Index **330**

Instructions to authors **331–333**
